EXPERIENCE

- **DronaPay** Dec 2024 - Present
Data and AI Agents Engineer Remote
 - Developed and implemented AI agents to enhance business operations and decision-making.
 - Case Analyzer Agent: Designed to analyze monetary transactions that breach volume and velocity limits, comparing transaction against data points to classify them as 'FALSE POSITIVE' or 'REVIEW.'
 - BAs Help Agent: Built an AI agent that aids business associates in navigating the company's UI platform, backend APIs, SOPs etc. improving overall user experience.
 - Rule Developer Agent: Created an agent to help users design custom JSON logic rules tailored to specific requirements, integrating human-in-the-loop system to ask clarifying questions and refine rules according to user inputs.
- **Kontiki Innovation Labs** Sep 2024 - Nov 2024
GenAI Developer Intern Remote
 - Built a sales meeting assistant application from scratch, designed to enhance the efficiency of sales meetings by leveraging conversational AI.
- **VirtuBox InfoTech Pvt. Ltd.** Jan 2024 - Jul 2024
Associate Software Developer Noida
 - Engineered engaging interactive kiosk games (maze solving, spin the wheel) for WWF and an attendance system managing over 200 attendees for EEMA, using JavaScript es6 and jQuery.

EDUCATION

- **Thapar Institute of Engineering and Technology** 2020 - 2024
Bachelor's of Engineering in Electrical and Computer Science Engineering Patiala, Punjab
 - CGPA: 7.97/10

PROJECTS

- **MeetingMind: AI-Powered Sales Meeting Assistant** December 2024
Tools: GPT-4o-mini, OpenAI Embeddings, LangGraph, AWS Transcribe, Chrome Tab Sharing, Python 
 - Built an AI-driven sales assistant using GPT-4o-mini and LangGraph, integrating AWS Transcribe and Chrome tab-sharing for real-time insights and deal optimization.
- **Samvidhan Sathi: LLM-powered Telegram bot for the Indian Constitution.** November 2024
Tools: GPT-4o-mini, OpenAI Embeddings, ChromaDB, SQLite, Telegram Bot API, Python, LangChain 
 - Developed a Telegram bot using GPT-4o-mini and OpenAI embeddings, integrated with LangChain to structure and streamline LLM interactions for Indian Constitution query resolution.
 - Leveraged ChromaDB to retrieve embeddings and SQLite for user data management, achieving 70+ seamless runs with accurate responses.
- **AWS-Inventory: Web-Based Inventory Management System** November 2024
Tools: Postgresql, React, Tailwind CSS, S3, RDS, EC2 
 - Developed an end-to-end Inventory Management System using TypeScript, React, Node.js, and PostgreSQL.
 - Deployed backend services on AWS EC2, PostgreSQL RDS, AWS S3 for Images and frontend on Vercel.
- **Laconte: Landing page for a fictional company focused on advanced materials** October 2024
Tools: React.js, TypeScript, Framer-motion 
 - Implemented a responsive design, optimized for desktop and mobile devices, with smooth navigation and a clean, professional aesthetic.
